HIGHLIGHTS OF THE ATTACHED ANALYSES OF THE IMPORTS AND EXPORTS OF DAIRY PRODUCTS UP TO **MARCH 2022**

Synopsis

- **The mass of imports of dairy products in 2021, was 24.8 percent higher than in 2020, and 0.03 percent higher than 2019. The increase from 2020 to 2021, was due to the increase in imports of two of the six categories of dairy products.**
- **The estimated mass of imports of dairy products in 2022, is 25.7 percent lower than in 2021, and 7.2 percent lower than 2020. The decrease from 2021 to 2022, is due to the decrease in imports of three of the six categories of dairy products.**
- **The average f.o.b. import prices in (January to March) 2022, of five of the six different categories of dairy products, are higher than in 2021.**
- **The mass of exports of dairy products in 2021, was 9.2 percent higher than in 2020 and 13.2 higher than in 2019. The increase from 2020 to 2021, was due to the increase in exports of four of the six categories of dairy products.**
- **The estimated mass of exports of dairy products in 2022, is 5.3 percent lower than in 2021 and 3.4 higher than in 2020. The decrease from 2021 to 2022, is due to the decrease in exports of four of the six categories of dairy products.**
- **The average f.o.b. export prices in (January to March) 2022, of five of the six different categories of dairy products, were higher than in 2021.**
- **The estimated mass of imports and exports in 2022, shows that South Africa is a nett importer of concentrated milk (04.02), whey (04.04), butter (04.05), and cheese (04.06) and a nett exporter of milk and cream (04.01), buttermilk and yoghurt (04.03).**
- **Graphs reflecting the mass of imports and exports per month of each of the six categories of dairy products, are shown in Annexure B.**
- **The mass of sales by South Africa to the other members of the Southern African Customs Union (Botswana, eSwatini, Namibia and Lesotho) in January to March 2022, of all six categories of dairy products, is higher than the mass of South African exports of the dairy products in the same period.**
- **The exposure in 2021, to foreign competition (that is imports plus exports) was the third highest in the 10 years from 2012 to 2021. The estimated exposure in 2022, is the lowest in the 11 years from 2012 to 2022.**

Note:

- *The estimated total import and export quantities in 2022, were calculated on the assumption that the levels of import in the first three months of 2022, will be maintained during the rest of 2022.*
- *Estimates regarding future imports and exports based on historic import figures should be viewed with caution as the pattern of imports (distribution per month of total import and export during a year) in different years differ meaningfully.*

Imports and exports of dairy products up to [March 2022](#)

This report was compiled by the Office of SAMPRO and forms part of the Industry Information Project of Milk SA. The purpose of the project is to make market signals available to members and other interested parties, which is a pre-requisite for effective competition, as envisaged by the Competition Act.

INTRODUCTION

1. The imports and exports figures of dairy products for January to March 2022, were recently released by SARS.
2. In this document, a brief analysis of imports and exports is provided per tariff heading. The estimated imports and exports in 2022, are calculated based on the assumption that the levels of the imports and exports recorded in the first 3 months of 2022, will be maintained during the rest of 2022. Estimates regarding future imports based on historic import figures should be viewed with caution as the pattern of imports (distribution per month of total import and export during a year) in different years differ meaningfully.
3. The patterns of imports and exports within each year (the distribution per month of the total imports and exports of the year) are indicated in Annexure B.

IMPORTS

4. The indices of the mass of imports in the years 2015 to 2022 are indicated in Table 1. The mass of imports is indicated in Annexure A.

Table 1: Indices of the mass of imports per tariff heading (2002=100)

5. Table 1, indicates that:

- The mass of imports in 2020, was 19.9 percent lower than in 2019. The decrease from 2019 to 2020, was due to the decrease in imports of three of the six categories of dairy products;
- The mass of imports in 2021, was 24.8 percent higher than in 2020, and 0.03 percent higher than in 2019. The increase from 2020 to 2021, was due to the increase in imports of two of the six categories of dairy products; and
- The estimated mass of imports in 2022, is 25.7 percent lower than in 2021. The decrease from 2021 to 2022, is due to the decrease in imports of three of the six categories of dairy products.

6. In Table 2, the mass of imports in January to March 2022, is compared with the mass of imports in January to March 2021.

11. The average import prices of five of the six different categories of dairy products increased from 2021 to 2022 (January to March), as follows:

- 04.01 15.9 percent;
- 04.02 10.3 percent;
- 04.03 19.0 percent;
- 04.05 19.2 percent; and
- 04.06 10.9 percent.

12. The average import price of one of the six different categories of dairy products decreased from 2021 to 2022 (January to March), as follows:

- 04.04 11.2 percent.

EXPORTS

13. The indices of the mass of exports in the years 2015 to 2022, are indicated in Table 5. The mass of exports is indicated in Annexure A.

Table 5: Indices of the mass of exports per tariff heading (2002=100)

20. The average export prices of five of the six different categories of dairy products increased from 2021 to January to March 2022, as follows:

- 04.01 9.9 percent;
- 04.02 11.2 percent;
- 04.04 61.4 percent;
- 04.05 2.5 percent; and
- 04.06 7.2 percent.

21. The average export price of one of the six different categories of dairy products decreased from 2021 to January to March 2022, as follows:

- 04.03 11.6 percent.

RATIO BETWEEN IMPORTS AND EXPORTS

22. The mass of imports as a percentage of the mass of exports of dairy products by South Africa, is a highly aggregated indication of the industry's international competitiveness. The ratios between the mass of imports and exports of the six categories of dairy products from 2015 to 2021, and estimated figures in respect of 2022, are indicated in Table 9.

Table 9: Mass of imports as a percentage of the mass of exports

23. As indicated in Table 9:

- The ratio between the imports and exports in 2020, in respect of three of the six categories of dairy products, namely milk and cream (04.01), whey (04.04) and cheese (04.06) was lower than in 2019;
- The ratio between the imports and exports in 2021, in respect of three of the six categories of dairy products, namely buttermilk powder and yoghurt (04.03), whey (04.04) and butter (04.05) was lower than in 2020;
- The ratio between the imports and exports in 2022, in respect of three of the six categories of dairy products, namely (04.01), concentrated milk (04.02) and whey (04.04) is lower than in 2021, and

- In 2022, the mass of exports of two of the six categories of dairy products, namely (04.01) milk and cream and (04.03) buttermilk and yoghurt exceeds the mass of imports.

EXPOSURE OF THE SOUTH AFRICAN DAIRY INDUSTRY TO FOREIGN COMPETITION

24. The sum of the mass of the imports and exports of dairy products by South Africa, is a highly aggregated indication of the exposure of the South African dairy industry to foreign competition, and this is indicated in Table 10.

25. From Table 10, it is clear that the exposure to foreign competition of the South African dairy industry:
- Was in 2020, the second lowest in the 9 years from 2012 to 2020;
 - Was in 2021, the third highest in the 10 years from 2012 to 2021; and
 - Is in 2022, the lowest in the 11 years from 2012 to 2022.

26. In Table 11, the mass of total sales of the different dairy products to the Southern African Customs Union (SACU) member states, namely Botswana, eSwatini, Lesotho and Namibia (BeLN countries) in the period January to March 2022, is compared to the mass of the exports in January to March 2022 by South Africa to other countries. Sales by South Africa to the other members of SACU, are not classified by SARS as exports.

Table 11: Mass of sales to the BeLN countries compared to exports outside of SACU from January to March 2022

27. Table 11, indicates that:

- The mass of the total sales of dairy products by South Africa to the BeLN countries from January to March 2022, exceeds the mass of exports. (Exports are sales to destinations outside SACU); and
- The mass of the sales by South Africa to members of SACU, of all six categories of dairy products from January to March 2022, exceeds the mass of exports by South Africa.
