2. The Crop Estimates Committee (CEC)⁵⁾ has published their **preliminary area planted estimate** for the **production season 2023/24** on **30 January 2024**. The CEC has also published their **final production figures** for the **2022/23 production season** on **8 February 2024**. The following two tables contain information in respect of maize and soybeans of the areas planted in each of the past 4 years and the estimates for the **new** year (Table 1), the crop sizes that have been realised in each of the past four years, as well as the **final production figures** for the **2023/2023** year (Table 2). Note that the first production forecast for the 2024 season (production season 2023/2024) will be available at the end of February 2024.
