THE IMPORTS AND EXPORTS OF DAIRY PRODUCTS UP TO MARCH 2024

Synopsis

- **The mass of imports in 2023, was 8.4 percent lower than in 2022. The decrease from 2022 to 2023, was due to the decrease in imports of three of the six categories of dairy products.**
- **The estimated mass of imports in 2024, is 17.3 percent lower than in 2023. The decrease from 2023 to 2024, is due to the decrease in imports of five of the six categories of dairy products.**
- **The average f.o.b. import prices in 2024 (January to March), of four of the six different categories of dairy products, are lower than in 2023.**
- **The mass of exports in 2023, was 8.0 percent higher than in 2022 and 10.0 percent higher than in 2021. The increase was due to the increases in exports of four of the six categories of dairy products.**
- **The estimated mass of exports in 2024, is 12.4 percent lower than in 2023 and 5.4 percent lower than in 2022. The decrease is due to the decreases in exports of five of the six categories of dairy products.**
- **The average f.o.b. export prices in 2024 (January to March), of all six different categories of dairy products, are lower than in 2023.**
- **The estimated mass of imports and exports in 2024, showed that South Africa was a nett importer of concentrated milk (04.02), whey (04.04) and butter (04.05), and a nett exporter of milk and cream (04.01), buttermilk and yoghurt (04.03), as well as cheese (04.06).**
- **Graphs reflecting the mass of imports and exports per month of each of the six categories of dairy products, are shown in Annexure B.**
- **The mass of sales by South Africa to the other members of the Southern African Customs Union (Botswana, eSwatini, Namibia and Lesotho) in 2024, of five of the six categories of dairy products, is higher than the mass of South African exports of the dairy products in the same period.**
- **The exposure in 2023, to foreign competition (that is imports plus exports) was the lowest in the 12 years from 2012 to 2023. The estimated exposure in 2024, is the lowest in the 13 years from 2012 to 2024.**

Note:

- *The estimated total import and export quantities in 2024, are calculated on the assumption that the levels of import in the first three months of 2024, will be maintained during the rest of 2024.*
- *Estimates regarding future imports and exports based on historic import figures should be viewed with caution as the pattern of imports (distribution per month of total import and export during a year) in different years differ meaningful.*

In Table 11, the mass of total sales of the different dairy products to the Southern African Customs Union (SACU) member states, namely Botswana, eSwatini, Lesotho and Namibia (BeLN countries) in the period 2024 (January to March), is compared to the mass of the exports in 2024 (January to March) by South Africa to other countries. Sales by South Africa to the other members of SACU, are not classified by SARS as exports.
