

THE IMPORTS AND EXPORTS OF DAIRY PRODUCTS UP TO JUNE 2025

Synopsis

- *The mass of imports in 2024, was 30.0 percent lower than in 2023. The decrease from 2023 to 2024, was due to the decrease in imports of five of the six categories of dairy products.*
- *The estimated mass of imports in 2025, is 24.9 percent lower than in 2024. The decrease from 2024 to 2025, is due to the decrease in imports of all six categories of dairy products.*
- *The average f.o.b. import prices in 2025 (January to June), of all six different categories of dairy products, were higher than in 2024.*
- *The mass of exports in 2024, was 4.5 percent lower than in 2023 and 3.1 percent higher than in 2022. The decrease was due to the decrease in exports of three of the six categories of dairy products.*
- *The estimated mass of exports in 2025, is 15.2 percent higher than in 2024 and 10.0 percent higher than in 2023. The increase is due to the increase in exports of all six categories of dairy products.*
- *The average prices in 2025 (January to June) of exports of three of the six categories of dairy products, were lower than in 2024.*
- *The estimated mass of imports and exports in 2025, shows that South Africa is in 2025, a nett importer of whey (04.04), and a nett exporter of milk and cream (04.01), concentrated milk (04.02), buttermilk and yoghurt (04.03), butter (04.05) as well as cheese (04.06).*
- *The estimated mass of sales of three of the six categories of dairy products to the other members of the Southern African Customs Union (Botswana, eSwatini, Namibia and Lesotho) in 2025, is higher than the mass of South African exports of the dairy products in the same period.*
- *The exposure in 2024, to foreign competition (that is imports plus exports) was the lowest in the 13 years from 2012 to 2024. The estimated exposure in 2025, is the lowest in the 14 years from 2012 to 2025.*
- *Graphs reflecting the mass of imports and exports per month of each of the six categories of dairy products, are shown in Annexure B.*

Note:

- *The estimated total import and export quantities in 2025, were calculated on the assumption that the levels of import in the first six months of 2025, will be maintained during the rest of 2025.*
- *Estimates regarding future imports and exports quantities based on historic import figures should be viewed with caution as the patterns of imports and exports (distribution per month of total imports and exports during a year) in different years differ meaningful.*

24. From Table 10, it is clear that the exposure to foreign competition of the South African dairy industry:

- The exposure in 2023, was the lowest in the 12 years from 2012 to 2023;
- The exposure in 2024, was the lowest in the 13 years from 2012 to 2024; and
- The exposure in 2025, is the lowest in the 14 years from 2012 to 2025.

25. In Table 11, the mass of total sales of the different dairy products to the Southern African Customs Union (SACU) member states, namely Botswana, eSwatini, Lesotho and Namibia (BeLN countries) in the period 2025 (January to June), is compared to the mass of the exports in 2025 (January to June) by South Africa to other countries. Sales by South Africa to the other members of SACU, are not classified by SARS as exports.
